NEW!
387

Trick out your Opti with the Opti hook-in halyard block. This newest go-fast from Harken lets you adjust a loaded halyard for max speed in all conditions. Pick a color—red or black.

Super-light glass-filled nylon shell saddles the mast to keep the sheave straight. The hook is fixed to stop line twist and reduce friction.

Tough 16 mm sheave is a free roller, with stainless balls for high loads. Block works great for high tensile strength line and also works with wire.
