

# CE CERTIFIED EXTERNAL ACCESS SYSTEM FOR MEGAYACHTS

This system provides freedom of movement and the ability to lock yourself in one position as you work outboard along the hull.

## STRONG, SMOOTH-ROLLING CARS

Cars are constructed of strong, lightweight one-piece solid aluminum. Torlon® ball bearings handle high loads, reducing friction to move you smoothly along the track as you change the locking pinstop to another position. Bearings do not corrode.

CE Certified and tested to: EN795.1996 Class D

## LONG-LASTING PROTECTIVE FINISH

Cars and track come in black Hardkote or clear-coat anodized finishes for corrosion protection, durability, and to match the aesthetics of your megayacht. Stainless steel systems can be special ordered through the Harken Custom Department.

Black Hardkote

Clear-coat

Pinstop car allows movement of cars along track. Open to move; close to lock in place.

Stainless steel wire guides keep the ball bearings captive when cars are off the track for easy maintenance.

## SUGGESTED SUPPORT SYSTEM & OPTIONS

### ATTACHMENT OPTIONS

Track and cars can be mounted to slide from multiple positions:

Mounted on vertical plane: cars face outward

Mounted on horizontal plane: cars face down

### REQUIRED SYSTEM CONFIGURATION

**⚠ WARNING.** Avoid personal injury. The EAS must be used with a full body safety harness and/or working harness or chair that meets CE/ANSI EN813 support standards.

#### 1. Full-Body Safety Harness

Use a full-body safety harness attached to the HC9606 access car with pinstop.

#### 2. Working Harness

Use a working harness or chair attached to the HC9606 access car without pinstop.

### ADDITIONAL OPTIONS

#### 3. Tool Service Car

Add an optional HC9565 pinstop car or HC9608 car with H-50547 coupler to work as your tool service carrier.
